

Teams participating in the Virginia Datathon will maintain ownership over any methodologies, code, inventions, algorithms and models developed using open data during the event.

Teams that choose to utilize their own data during the event are required to share this data with other participating teams and the Commonwealth of Virginia.

Methodologies, code, inventions, algorithms and models made solely by employees, agents, consultants, independent contractors or other representatives of the Commonwealth of Virginia will be solely owned by the Commonwealth of Virginia.

Methodologies, code, inventions, algorithms and models made jointly by employees, agents, consultants, independent contractors or other representatives of the Commonwealth of Virginia and participating team members of the Virginia Datathon will be owned jointly by the jointly contributing Parties.
